

Literacy/Topic:

Write a set of instructions to inform someone how to ice skate.

You could set out in this order:

Title

Equipment list.

Instructions

(use bullet points or numbers to separate each step.)

A diagram

Have you included all these parts in your instructions?

Time connectives

Present tense

Second person

Detailed descriptions

Numeracy:

Collect a set of numbers such as peoples favourite number, the temperature each day over the last week etc then collate this information in a table

After that, work out the mode, median, mean and range for your set of data.

Mode

The mode is the value that appears the most.

Median

The median is the middle value.

Mean

The mean is the total of the numbers divided by how many numbers there are.

Range

The range is the **difference** between the biggest and the smallest number.

Other Activities:

Practise your times tables and get someone at home to test you but in a random order.
